Projects Status

- The Open Source Working Group will steer work packages associated with the projects contributed by Intel to the foundation

In progress:

- The GitHub repositories should be located within a neutral GitHub organization and may need to move from current organization (Working Group will agree the approach with maintainers)
- Projects will be advised to use some of the [CNCF templates](#) and guidelines to encourage collaboration and contributions from the community

UXL
Unified Acceleration Foundation

Group Status

- A public calendar of meetings is now available. (Linked from [the foundation repo](#));
- We are still transitioning the community to the new mailing lists.

- SIGs have continued to meet quarterly. We are encouraging more diversity of organizations participating.
- A Safety Critical SIG has been proposed and approved.

- Working Group leads appointed, initial meetings will begin soon.
- Important to have organizations become members so that they can join these meetings.
